PROJECTS

Campus Solutions.

Developed a web platform for academic resource sharing. The site features download facilities for previous years' exam papers and notes, along with a buy/sell marketplace for students. Utilized HTML, CSS, and JavaScript for the frontend, and Node.js with Express.js for the backend. Implemented secure JWT-based user authentication, efficient file handling with multer, and MongoDB for data management.

Weather App .

Developed a dynamic weather application using HTML, CSS, and JavaScript. Implemented real-time weather data retrieval from APIs, enhanced user interface with responsive design, and ensured cross-browser compatibility. The app features location-based weather updates, interactive UI elements, and user-friendly navigation for an engaging and informative user experience.

REST API .

Simulated a REST API using Node.js and Express.js, handling CRUD operations with GET, POST, PATCH, PUT, and DELETE requests.Utilized Postman for testing, integrated a custom JSON file for data management
